

It is a great pleasure for me to congratulate the Society of Polymer Science, Japan, at the occasion of its 30th anniversary. As the editor of "Die Makromolekulare Chemie" and "Die Makromolekulare Chemie, Rapid Communications", the contact with Japanese Polymer Chemists was always very close and friendly over many years, and in execution of my professorship I had the pleasure to do scientific work together with several Japanese post doctorate fellows.

I should like to give this way my best greetings to the polymer chemists in Japan with all good wishes for the future.

Won Taik Kim

On the occasion of the 30th anniversary of the Society of Polymer Science, Japan, I am forwarding my sincere congratulations and heartiest greetings to the Japanese Polymer Chemists. During my stays in Japan and also at other occasions I have met many of them, and I am proud to say that several of these are now very good friends [of mine.

I admire and appreciate the achievements of the Japanese colleagues in the field of Polymers very much. Their dedication to their work is most outstanding and known all over the world. I am sure they will continue to contribute to the further development of Polymer Science most successfully.

My very best wishes for the future!
